LIT-FLY-ULTRAPAD

ULTRAPAD™
PEACE OF MIND

Why ULTRAPAD™?

- Specifically designed fiber enhanced concrete with rebar reinforcement – Tough and Durable
- Engineered for a wide range of KOHLER® residential stand-by generators
- Provides a strong foundation – confidence to protect your KOHLER® generator investment
- Aesthetic design – professional finished installation
- No maintenance
- Warranted for the life of the KOHLER® generator

UltraPad™ is designed and engineered for KOHLER® generators.

Provide Peace of Mind with UltraPad™

Protect your customers' investments with the UltraPad™—developed to work with KOHLER® residential generators. The mounting pad acts as a stable surface for the generator to live on and is warranted for the generator's life. The pad's fiber-concrete composition means no shifting or sinking over time. UltraPad™ has built-in inserts to provide the means to secure the generator to the pad – the ultimate in stability.

UltraPad™ Meets Your Needs

UltraPad™ installation is fast and easy due to the pad's contoured design. The generator mounts securely to the UltraPad™ using built-in inserts and bolts, ensuring a stable and damage free home for your generator. The pad requires no clean up or maintenance.

The standard 3" UltraPad™ is fit for most residential areas. The thicker, heavier 4" UltraPad™ is best suited for storm prone coastal areas.

UltraPad™ vs. Other Installation Methods

| | UltraPad™ | Concrete | Gravel |
|--------------------|-----------|----------|--------|
| Quick Install | Yes | No | No |
| Maintenance | No | Yes | Yes |
| Clean Up | No | Yes | Yes |
| Lifetime Warranted | Yes | No | No |
